VACANCY DRAFTSMAN/WORK PREPARATOR SHIPBUILDING ENGINEERING

Are you a shipbuilder who would like to work in a technical, innovative environment where craftsmanship is deeply valued, with a team of dedicated colleagues? This job could be just right for you!

For our Shipbuilding Engineering department we are looking for a Draftsman/Work Preparator. This department is responsible for the overall shipbuilding engineering of the yacht/ship. In this role you are specifically engaged with drawings and work preparation in the development phase of the yacht/shipbuilding construction. These projects can be in different stages. You are constantly in contact with production and the finishing halls are close at hand.

Performance Areas

- Deliveries:
 - Preparation of detailed arrangements and principles for approval of Clients, Flag and Class authorities.
 - Preparation of detailed arrangements and principles for use by structural (detail) engineering.
 - Detail information package (drawings & specifications) for Outfitting, Stainless Steel and Paint production departments.
 - Preparation and maintenance of weight calculations and reports
 - Preparation of purchase requests in the Heesen Yachts network.
- Information packages/arrangements
 - Starting point is the basic naval architect design package (for new designs), an existing information package (for sister vessels) and a standard/example detail library. Together with your engineering and production colleagues, you convert this info into a new production package. This new package consists of detailed arrangements, principle details, detailed drawings, specifications, weight calculations, CNC preparation and material requests orders.
 - The information package mainly consists of CAD drawings, either initially designed in 3D (Catia V6 or Rhino 5) or 2D (AutoCAD 2015).
 - Assistance in maintaining of a detail library (2D and/or 3D). Purpose is to be able to quickly generate, built proven details and thus eliminating undesirable engineering time of items which have already been designed and successfully applied in the past.
 - Validation of engineering items on board by means of check sheets.
 - Knowledge of applicable Rules and Regulations to ensure compliance.
 - Development of new details. Substantial new details should be supported by a form which considers all the relevant point of views (quality, engineering and production costs, etc).
- Communication & monitoring:
 - Constantly communicate with colleagues over status of work, information flow and progress.

Requirements

- MBO (institute of technology) Shipbuilding or MBO education level in combination with relevant work experience.
- AutoCAD, Rhino and of course, thorough knowledge of computers.
- Written and spoken English.
- Proven experience in outfitting engineering.
- Hands on mentality.

La risorsa inoltre è

- **dotata di mezzo proprio**
- in possesso di **PATENTE D**

per informazioni e candidature scrivere a: paola.salvatori@cpi.alfaliguria.it

LUOGO DI LAVORO: Olanda

PROFILI RICHIESTI:

**ELETTRICISTA CIVILE/ INDUSTRIALE -
IDRAULICO CIVILE/INDUSTRIALE E
MANUTENTORE IMPIANTI TERMICI -**

Assemblatore - saldatore con DUE ANNI DI ESPERIENZA

Le condizioni di lavoro saranno specificate nel corso della presentazione il giorno 11 ottobre 2018
alla Cittadella dei giovani di Aosta

VACANCY

1. FUNCTION

Project leader Shipbuilding Engineering

2. PLACE IN ORGANISATION

Working at department : Shipbuilding Engineering
Report to : Assistant & Manager Shipbuilding Engineering
Supervising : Team of drafts men and work preparator

3. FUNCTION GOAL

The function aims to achieve the required quantitative and qualitative output of the project in accordance with the requirements and standards of the organization and the customer specifications.

4. PERFORMANCE AREAS

- Generation of information packages for the shipbuilding, outfitting and paint production departments as well as for the purchasing department within the pré-defined requirements and conditions.
 - The information package mainly consists of CAD drawings, either initially designed in 3D (Catia V5 or Rhino 5) or 2D (AutoCAD 2015).
 - Starting point is the basic naval architect design package. Together with your engineering and production colleagues, you convert this package into detailed structural and outfitting drawings, weight calculations, CNC preparation and material requests orders.
 - Key element in the entire process is to manage the information flows; means taking care that information necessary to be integrated in your project is there in time, but also available for other departments. Due to the short leading times of our projects, this means every day attention and good flexible, problem identifying & solving and stress resistant skills. A constant switch between a very focussed/detailed and company-wide helicopter view is very important.
- Supervising your project engineering team and ensuring optimal deployment and availability of required skills and resources.
 - This process starts with making a detailed project work schedule including relating hour budgets, which has to be weekly monitored and reported. The main budget is already determined.
 - In consultation with your colleague shipbuilding engineering project leaders, you assign work tasks (and budget hours) to your own team and monitor their progress.
 - You coach/direct your team members in order to develop their skills and to achieve constant optimisation.
 - Performance/job evaluation meetings with your team members are part of your work scope.
- You will prepare or design principle details yourself (in 2 or 3D) and have them worked out by your engineering team.
- Due to the broad scope of our engineering package, it is required to have thorough and practical knowledge off all aspects. This varies from a good understanding of structural basic engineering, via practical constraints of outfitting items like aligning of multiple in-line hinges to the working of a CNC cutting machine.
- You will take care that the entire info package of your project is in line with Class and Flag state requirements.
- You will make/monitor all necessary (mainly strength) calculations according to Class societies (ABS or Lloyd's SSC). A FEM analysis is in general subcontracted. Judging the result is of course part of your scope.
- Taking care of technical specifications for purchase items and review of technical part of returned quotations.
- Generation of all necessary information for change orders from owner's team.
 - This means for our department a description for the requested change, the technical solution for this and an overview of all consequences (technical, labour costs, material costs and weight).
- Checking of work in accordance with quality standards.
 - This varies from a library of standard and example drawings to commissioning check sheets.
- Perform and supervise the work in accordance with the house rules, occupational health and environmental safety standards.

5. COMMUNICATION

Internal

- Manager Shipbuilding Engineering
- Assistants to Managers
- Project leaders Engineering
- Project leaders Shipbuilding Production, Supervisor Paint en Outfitting
- Draftsmen and work preparators
- Purchasing
- Naval Architect D&D
- Customer Support & After Sales
- Cost & Accounting D&D

External

- Subcontractors (mainly engineering and partly production)
- Classification societies and Flag states
- Suppliers (in consultation with purchasing)

6. JOB REQUIREMENTS

- HTS (institute of technology) Shipbuilding or HTS education level in combination with relevant work experience.
- AutoCAD, Rhino and of course, thorough knowledge of computers.
- Written and spoken English.
- Proven experience in shipbuilding (main en detailed) engineering, supervising of engineering team members and budget control.
- Hands on mentality.

Are you a shipbuilder with drawing office/construction experience and are you ready for the next phase in your career? This job could be just right for you!

Supervising veterinarian (practitioner) in The Netherlands

As a supervising veterinarian (practitioner) you will monitor food safety and animal welfare. This includes ensuring compliance in abattoirs, animal transport, import and export certification of products with animal origin. You will supervise with an emphasis on procedural supervision and enforcement, taking appropriate measures where necessary. You will also advise on the implementation of laws and regulations.

Depending on workload you will be deployed to small, medium, and large abattoirs (red meat and/or poultry). You will also visit primary companies, export collection centers and cold stores.

Official veterinarians, are present during processing of animals presented for slaughter. They carry out a range of duties, including ante- and post-mortem checks and checks on the health and welfare of animals presented for slaughter. These official control duties ensure that food business operators have produced meat in accordance with regulatory requirements, with a health mark applied to show that meat is safe to enter the food chain. The NVWA is a government organization and has a dedicated team of trained and skilled veterinary auditors who carry out compliance audits on a scheduled (announced) basis.

The Company **offers an intensive Dutch language course** aimed at achieving level B2, a requirement for entering the substantive training program. A basic test and an assessment (both in English) are part of the selection procedure.

Our offer:

- An excellent salary (based on 30 hours/week) and secondary terms of employment;
- A contract for a year with the possibility of extension (to a permanent employment);
- Dutch language course (salary paid during course);
- Training (partly on the job) with our client;
- Support at housing;
- Support at mandatory registration in Dutch veterinary register (CIBG);
- Discount on a collective health insurance plan;
- Use of a company car (after completing the Dutch course successfully).

Requirements

- You are a legally qualified veterinarian and your diploma is recognized by the Dutch Veterinary Register, in compliance with the relevant European Directive;
- Experience as a veterinarian or within the sector is preferred;
- You speak and write English fluently;
- You have excellent written and verbal communication skills, and the ability to quickly learn spoken and written Dutch;
- You display strong business acumen; you prioritize effectively and make decisions quickly when necessary;
- You consistently embody the NVWA's mission and values;
- You are self-confident and perform well under pressure;
- You have a valid driving license;
- You are willing to move to the Netherlands.

Timetable

Start of this vacancy is April 2019. The deadline for application is December 15th 2018.

Please send your CV in English to:

Marirosa Chiocca marirosa.chiocca@cpi.alfaliguria.it (applications from Northern Italy)

Anna Bongiovanni anna.bongiovanni@regione.abruzzo.it (applications from Central and Southern Italy)
